Introduction

Revenue Cycle Management (RCM) Operations PEAK Matrix® Assessment 2023

2022 was a tumultuous year for healthcare providers in the US. With patient volumes still below pre-pandemic levels, a jump in the average length of stay, intensified talent shortages, and rising costs, approximately half of the hospitals in the US witnessed negative margins. As revenue pressures on healthcare providers aggravate, focus on futureproofing the revenue cycle operations has come to the forefront, and healthcare providers seek the support of third-party vendors to make the revenue cycle process more effective and efficient and to assuage the current challenges.

Additionally, to better address the evolving needs of healthcare providers, service providers are investing in scaling their talent pools, strengthening their technology portfolio to drive value through automation and analytics, and leaning toward mergers and acquisitions to expand their value chain coverage and depth in the hypercompetitive revenue cycle market.

In this research, we present an assessment and detailed profiles of 31 RCM operations providers featured on the Revenue Cycle Management (RCM) Operations PEAK Matrix® for 2023. Each provider profile provides a comprehensive picture of its service focus, key Intellectual Property (IP) / solutions, domain investments, and case studies. The assessment is based on Everest Group’s annual RFI process for the calendar year 2023, interactions with leading RCM providers, client reference checks, and ongoing analysis of the RCM services market.

This report includes the profiles of the following 31 leading revenue cycle operations providers featured on the RCM operations PEAK Matrix:

- Strengths**

 - Provider 1 is a HITRUST-accredited prominent offshore RCM specialist with a decent presence across the value chain. Over the years, it has increased its presence in processes such as A/R management. Additionally, it is also focusing on expanding its presence in synergistic areas such as utilization management and risk-adjusted coding
- Limitations**

 - Provider 1 delivers a majority of its RCM services from offshore locations. While this allows the firm to take advantage of the cost-arbitrage opportunities, the lack of a decent onshore presence can be a point of contention for healthcare providers who prioritize proximity and better control given by an onshore presence
